

Skills

Javascript | Typescript | React | Nextjs | React Native | Expo | Tailwind | Python | FastAPI | Nodejs | Express | Prisma ORM | PostgreSQL | MongoDB | Redis | Docker | DigitalOcean | GCP | Langfuse | Qdrant | Neo4j

Experience

SSingularitee Technologies | Software Engineer Thane, Mumbai | July 2024 - Present

- Built **OutCallerAI** (outcalleraai.com), an AI-powered outbound & inbound calling platform with integrations like Whatsapp, Excel, Forms, Sheets, Drive & many more that automates multilingual lead qualification and follow-ups.
- Built **Echo**, an AI chat widget that captures inbound leads and converts them into automated outbound calls via OutCallerAI.
- Led a 5 member team** to build a production-grade **RAG system** (Bharatgen) over **22k+** documents, implementing end-to-end pipelines with Qdrant, Neo4j, and Langfuse on a self hosted infrastructure, achieving **<3s** response latency.
- Developed **OutRiskAI** (outriskai.com), a legal AI assistant that summarizes contracts, highlights risks, and connects users with real lawyers to streamline contract review workflows.
- Built a live energy monitoring and analytics system using **Next.js**, **WebSockets** and **InfluxDB** to display real-time and historical data, implemented GitHub Actions for **CI/CD**.
- Led a 5 member team** to build an **RPA platform for healthcare** using Selenium + FastAPI - automated data entry across **7+** hospital platforms, saving hundreds of manual work for doctors and nurses.
- Developed a production-ready platform for Cureight (cureight.xyz) with **Stripe** powered subscriptions, enabling seamless onboarding, payments, and gated content access for users.

SSingularity Technologies | Web Developer Intern Thane, Mumbai | Jan 2023 - July 2023

- Improved website performance and enhanced UI design by optimizing components and implementing responsive layouts using HTML, CSS, Bootstrap, Chart.js and JavaScript.

Education

K.C College | BE Computer Engineering 8.82/10 | Mumbai | 2022 - 2024

K.J Somaiya Polytechnic | Diploma in Computer Engineering 93% | Mumbai | 2018 - 2021

Projects

Waitlyze | No Code Waitlist Builder Platform waitlyze.falakgala.dev

- Built a **no-code web platform** that lets creators design and launch branded **waitlists** in seconds using a visual form builder.
- Integrated **analytics**, **social-share widgets**, and **email verification**, helping makers grow and manage their large audiences.
- Tech Stack - Nextjs, Tailwind, Shadcn UI, Uploadthing, Clerk, Prisma ORM, PostgreSQL, Neon, Vercel.

Glyph | Local-first Markdown Editor github.com/Falak097/glyph

- Built a **filesystem-native markdown workspace**, eliminating abstraction layers and enabling direct interaction with local files and folders.
- Engineered a **recursive file explorer with nested folders, recent files, and global search**, allowing seamless navigation across large note collections.
- Tech Stack - Electron, React, Tailwind, Shadcn UI, Zustand, TipTap Editor.
